

Solar training at its best.

Why choose Mars Electric and SEI for your green energy training?

Mars Electric is partnering with SEI to offer a comprehensive five-day training on the fundamentals of solar electric. Since 1991, Solar Energy International has taught more than 20,000 alumni to design and install renewable energy systems. We are honored to help train the green energy workforce in the growing Ohio renewable energy economy.

PV101: SOLAR ELECTRIC DESIGN AND INSTALLATION (GRID-DIRECT)

October 1-5, 2012

Willoughby, OH

Tuition: \$1575

This PV101 training will focus on the fundamentals of how to design and install a solar electric (PV) system. This training will provide an overview of the three basic PV system applications, primarily focusing on grid-direct systems. Your experienced instructor will lead you through the core concepts necessary to work with all PV systems, including: system components, site analysis, PV module criteria, mounting solutions, safety, and commissioning. PV101 will also cover the basics of sizing a residential grid-direct system, wire sizing, overcurrent protection, and grounding. This class will include classroom and hands-on sessions.
